

Parsing Theory

Seppo Sippu and Elias Soisalon-Soininen

*EATCS Monographs on
Theoretical Computer Science*

Springer-Verlag

Vol. I: Language and Parsing

Vol.15, 228 pages, 55 figures 1988

1. Elements of Language Theory
2. Algorithms on Graphs
3. Regular Languages
4. Context-free Languages
5. Parsing

Vol. II: LR(k) and LL(k) Parsing

Vol. 20, 426 pages, 110 figures 1990

6. LR(k) Parsing
7. Construction and Implementation of LR(1) Parsers
8. LL(k) Parsing
9. Syntax Error Handling
10. Testing Grammars for Parsability

Table of Contents (total 445 page = 150+294)

1. Elements of Language Theory	43
1.1 Mathematical Preliminaries	1
1.2 Languages	11
1.3 Random Access Machine	20
1.4 Decision Problems	24
1.5 Computational Complexity	31
1.6 Rewriting System	39
2. Algorithms on Graphs	7
2.1 Basic Algorithms	1
2.2 Finding Strongly Connected Components	2
2.3 Computing Functions Defined on Graph	-
2.4 Computing Relational Expressions	-
3. Regular Languages	31
3.1 Regular Expressions	2
3.2 Finite Automaton	9
3.3 Regular Grammars	20
3.4 Deterministic Finite Automaton	25
3.5 Decision Problems on Regular Languages	31
3.6 Application to Lexical Analysis	-
4. Context-free Languages	22
4.1 Context-free Grammars	1

Kwang-Moo Choe

PL Labs.,

Dept of CSAIST

4.2 Leftmost and Rightmost Derivations	3
4.3 Ambiguity of Grammars	7
4.4 Usefulness and Nullable Symbols	11
4.5 Canonical Two-form Grammars	14
4.6 Derivational Complexity	18
4.6 Context-free Language Recognition	22
5. Parsing	47
5.1 Pushdown Automaton	1
5.2 Left Parsers and Right Parsers	9
5.3 Strong LL(k) Parsing	22
5.4 Strong LL(k) Grammars	25
5.5 Construction of Strong LL(1) Parsers	32
5.6 Implementation of Strong LL(1) Parsers	-
5.7 Simple Precedence Parsing	37
6. LR(k) Parsing	93
6.1 Viable Prefixes	2
6.2 LR(k)-Valid Items	17
6.3 Canonical LR(k) Parsers	32
6.4 LR(k) Grammars	40
6.5 LALR(k) Parsing	47
6.6 SLR(k) Parsing	60
6.7 Covering LR(k) Grammars by LR(1) Grammars	74
7. Construction and Implementation of LR(1) Parsers	29
7.1 Construction of SLR(1) Parsers	1

7.2 Construction of SLR(1) Parsers	4
7.3 Construction of LALR(1) Parsers	6
7.4 Implementation of LR(1) Parsers	-
7.5 Optimization of LR(1) Parsers	16
7.6 Parsing Ambiguous Grammars	-
8. LL(k) Parsing	76
8.1 Viable Suffixes	2
8.2 LL(k)-Valid Items	15
8.3 Canonical LL(k) Parsers	24
8.4 LL(k) Grammars	29
8.5 Construction of LL(1) Parsers	52
8.6 Non-Left-Recursive Grammar Covers	58
8.7 Predictive LR(k) Grammars	66
9. Syntax Error Handling	25
9.1 Syntax Errors	1
9.2 Error recovery in SLL(1) Parsers	7
9.3 Error recovery in LR(1) Parsers	11
9.4 Error Reporting	20
10. Testing Grammars for Parsability	71
10.1 Efficient Algorithms for LR(k) and SLR(k) Testing	2
10.2 Efficient Algorithms for LL(k) and SLL(k) Testing	24
10.3 Hardness of Uniform LR(k) and LL(k) Testing	36
10.4 Complexity of LALR(k) and LALL(k) Testing	58
